G-4 Assessment of CSA Focus Areas

- Logistics concerns best addressed by having logistics representatives embedded in each Task Force.
- *If* there is a decision for a Focused Logistics Focus Area:
  - It should be integration of logistics initiatives from the other 16 Focus Areas.
  - It should address personnel, engineer and medical initiatives.

Bottom line: **Log issues best addressed thru 16 original CSA Focus Areas; a 17th Focus Area on logistics will detract from overall log transformation efforts**
